I became obsessed with coding while studying for an Insurance Data Analytics Designation with my previous employer. During the pandemic, I quit a comfortable job to pursue a career as a developer in Big Data and Automation. I'm self-taught with a proven history as a high-performing, self-starter. I've spent the last two years building interesting projects, learning relevant skills, and taking on freelance opportunities by helping professionals automate their daily tasks.

WORK EXPERIENCE

PERSONAL PROJECTS

Andy Thomas Professional Website
- Built, Deployed and Run by Andy Thomas
- Skills Applied: Python, Flask, HTML, CSS and Bootstrap
- View website below:
  https://andythomasdotpy.herokuapp.com/

Whisky-Valuator
- I collect rare and interesting whiskey but needed an easy way to value my bottles
- This program scrapes a secondary auction site, converts the currency in real time (using an X-Rate API) and creates an easy to read chart to track pricing trends
- Skills Applied: Python, Beautiful Soup, HTML, REST API, Pandas, Matplotlib and Seaborn
- View source code below:
